

ROOFINOX®

Like no other.

Roofinox PE

The pigment remover

Advantages at a glance

- For removing the Roofinox Spectra pigmentation
- Effective and time-saving application
- After application, solder Roofinox as usual
- Ideal for workshop and construction site

Technical information

- Bring spray can to room temperature, processing temperature: 5° to 30° C.
- Tape off areas not to be pickled with masking tape (Attention: Protect adjacent areas and components from spray mist and gel).
- Apply generously and allow to work in (> 5 - 10 min), remove with a suitable tool (aluminium/plastic spatula), rub dry with a clean cloth and remove pigment residues.
- The content of one can is sufficient for approx. 0,8m² or approx. 20m soldering seam.
